

Seminar organized as part of the project DASTU, Department of Excellence on Territorial Fragilities

Contemporary Alpine Landscape and Fragilities

UPDP PhD programme: research on spatial and landscape planning issues in mountain contexts

The seminar is part of a PhD research project (UPDP programme) and aims at investigating the issues concerning the landscape planning and project as tools able to face the fragilities affecting the contemporary alpine landscape. Alpine landscape fragilities compose a complex plot interpreted as the result of alterations in the local balance conditions. Fragilities are identified and explored in relation to global and local phenomena producing both spatial and economic transformations in the alpine arc and involving the landscape in their effects. Landscape, as an ongoing process, is composed of the results of global and local phenomena and testifies the physical transformations produced by social and economic uses in its spatial structure. On the one hand, those uses contribute to the definition of landscape qualities, on the other, to fragilization processes. During the seminar, alpine landscape fragilities are discussed in relation to the perspectives for the governance of the heterogeneous mountain context characterised by shrinking and abandonment phenomena and increasing and overuse dynamics. In this frame, spatial and landscape planning and project are investigated as tools to address strategies and actions to overcome the fragilities affecting the landscape and to protect, enhance and regenerate the mountain contexts.

28 th January 2021

Politecnico di Milano, MS Teams: [link](#)

programme :

9 30

Introduction

Gabriele Pasqui / DASTU
TF Project Scientific Coordinator
[The topic of territorial fragilities](#)

Barbara Caselli / University of Parma, Department of Engineering and Architecture
[The landscape of the Parma Apennines: opportunities for the local development among fragility and values](#)

9 40

Presentation of the ongoing PhD research

Silvia Restelli / DASTU
PhD Candidate TF Project
[Contemporary Alpine Landscape VS Fragilities](#)

11 45

Discussion and conclusions

Angioletta Voghera / Politecnico di Turin, Interuniversity Department of Regional and Urban Studies and Planning (DIST)
Davide Del Curto / DASTU
Andrea Arcidiacono / DASTU

10 15

Alpine landscape fragilities and project perspectives

Manfred Perlik / University of Bern, Centre for Development and Environment (CDE)
[The spatial and economic transformation of mountain regions. Landscapes as commodities](#)
Michael Schmölz / Technical University of Munich, Department of Architecture, Landscape Architecture and Regional Open Space (LAREG)
[The socio-spatial qualities of the alpine landscape](#)
Massimo Sargolini / University of Camerino, School of Architecture and Design (SAAD)
[New development paths for the Marche Apennines after the earthquake](#)
